NON-PERIODIC TILE SETS

Perplexing Poultry

Created by Roger Penrose, these sets are fine examples of his non-periodic tiling work. Fill a roughly circular outline with two styles of chicken tiles. For almost endless diversity, also included are five dog tiles -- add one or more of these to create entirely different puzzles, all reminiscent of the works of the late M. C. Escher. Manufactured from precision-made high quality plastic, each set consists of 190 poultry pieces, 5 dogs and a 4-piece base board delineating the approximate size of the finished tiling, packed in a presentation case. Available in Escher-esque black and white or full color.

Pentaplex Tile Puzzles Price S/H Qty

Poultry, blk/wht (PX01) 65.00 3

Poultry, color (PX02) 99.00 3

PENROSE JIGSAW PUZZLES

We offer several styles of Roger Penrose's non-periodic tiling designs, cut into classic jigsaw puzzles. The repetitive nature of the designs make these puzzles extremely challenging!

Pentaplex Jigsaws Price S/H Qty

Perplexing Poultry (PX05) 14.00 1

Cat amongst Pigeons (PX06) 14.00 1

Fantastic Fish (PX07) 14.00 1

Abstract Geometric (PX08) 14.00 1

Arjeu Puzzles

Price S/H Qty

Hex Cluster (CT003) 24.00 2

Twelve notched hexagonal logs, each having a 2cm-diameter cross-section, fit together three different ways to form a symmetrical cluster. 12cm.

Pluton (CT432) 85.00 2

A dodecahedral starred form resembling a copper molecule, consisting of sticks and balls in two sizes. With the pieces, you can create a small tetra-hedral star, a regular dodecahedron, or other imaginative forms.

Imbroglia (CT728) 42.00 2

Webster defines imbroglia as a "confused mass." Evidently, Webster has seen this puzzle. Twice-notched wooden pieces with square cross-sections fit together in an apparently confused fashion to form a hollow sphere.

Pentangle Puzzles

Price S/H Qty

Ball & Chain (PE20) 11.00 1

Can you remove the ring and keep your head? (No fair untying the knot.) Used by the Oonai witch doctors: if the suspect solved the puzzle, he was deemed guilty and executed. Otherwise he went mad in the attempt and was innocent.

Papachuck (PE24) 36.00 2

Thread and slide your way through this

54-piece puzzle, based on a design by Ron Cook. In addition to recreating the original puzzle shape, a myriad of other variations are possible using the same pieces.

Mayer's Cube (PE72) 40.00 2

Designed by Derek Mayer, this very complex cube utilizes only 6 pieces but requires 5 to be moved before the first piece can be taken out. We hope you have a good memory when you go to put it back together!

Pentacubes (PE33) 13.50 1

This set begins with all twelve possible variations of five cubes joined face to face in one plane. From these beginnings, form literally thousands of flat and solid shapes in two and three dimensions.

Ordering and Delivery

Complete the order form by filling in quantities of the items you want. We normally ship within 3 business days after receiving your order. If we anticipate a shipping delay of more than 2 weeks, we'll notify you. Since we can't control the speed of postal or parcel services, allow 4 to 6 weeks for delivery (longer outside US).
